Meet The Wallet Doctor

Hi, my name is Scott! I'm experienced in futures and options as well as real estate investing but my main focus today is on building large positions in the stock market while prices are low in certain stocks. Today I'm a successful author, speaker, stock investor, finance professor and researcher but I started out decades ago wondering how to get started the right way. Through very hard work, exasperation, and finally exhilaration, I eventually found the right way to invest in equities— long term where taxes are low and I don't compete with Wall Street. Now I show people how to become their neighbor's millionaire next door in the stock market!

The Buzz About The Wallet Doctor!

"The degree to which Dr. Brown cares about our financial success comes through in his warm voice. Scott is passionate about his subject. All of this adds up to make the Wallet Doctor a dynamic and captivating speaker for your event or interview for your show."

Stefanie Hartman (www.StefanieHartman.com) Vancouver, BC

"Scott Brown is the only Ph.D. in finance who has also been well versed in Tharp Think. He really understands the psychological tools that I teach and has truly incorporated them into his life. I have seen him develop into a courageously unique and independent thinker as a financial economist. What is unique about Dr. Brown is that he is one of the very few doctors of finance that can "see the forest through the trees" because even though he understands all of the major financial derivations and theories he also understands their human limitations that wreak havoc on most investors. Scott has always been reliable and absolutely true to his word over time as both a friend and finance professional."

Dr. Van K. Tharp, Ph.D. (www.IITM.com) Cary, NC

"I am the personal assistant to the highly sought, behind the scenes, marketing expert sought by top people in the information marketing industry — Stefanie Hartman. I make things happen behind the scenes for Miss Hartman's clients and can really tell who is who. The key characteristic that I have observed about Dr. Scott Brown, Ph.D. — our Wallet Doctor - is rock solid reliability. When ever we have a conference call or meeting of any kind Scott is the one person I can count on to be punctual, laser focused, on topic, and always upbeat and cheerful!"

The Wallet Doctor Testimonials!

"I have a Masters Degree, and that was hard enough. A Doctorate is even more so. Dr. Brown has struggled through and beat adversity in his own finances and trading. He has put a lot of time into his Bulletproof Stock Investing course. Finally, he makes himself open and available to all of us through e-mail, telephone, and open calls. He draws people who are more inclined to be serious, and have more money to invest but he also works with people who are just starting out because that is how he began."

Bruce, H., Cincinnati, NY

"Dr. Brown has the only system that works! Dr. Brown has created a stock investing system based on the high finance of the fact that what is really low today is usually really high in a few years from today and vice versa. The only ingredient you have to add is a little patience. It will be obvious to you that this works as long as you can keep patient and hang in through the shakeouts like Dr. Brown teaches. It's simple. Dr. Brown makes it simple enough to where in 2 or 3 days you may not be an absolute expert in stock investing but you will be long way down the road and will know what you need to know to make money in the stock market. It's simple and it works, you just to have the patience to wait it out...no wave theory, stochastics, MACD or none of that complicated nonsense that just doesn't work. It doesn't take a genius to make this system work and you don't have to go through months of hard study to find out it doesn't work. I've spent thousands of dollars on courses before and none of them worked. This is something to where after a couple of three days you can have an idea of what happens and what you gotta do to make it all work. These salesmen out there know more about marketing than they do about stock investing and just wanted into my wallet. Dr. Brown is the real deal and he gives you so much understanding that it just boggles your mind and doesn't leave you confused like other courses do. This is a basic course for the stock market and not only will you know how to read a chart when you finish reading his course but also you will learn how to make a fortune as long as you can wait the 3 to 10 years it takes for your positions in the stock market to take off!"
